

It starts to burn pellets with the push of a single button, as only the best pellet boilers can. This model has power of 18 kW that are ideal for warming-up spaces between 120 and 150 m². It's designed to be suited in your basement, taking bigger care of the aestetical aspect of your living, being discreet regarding your interior decorations with its "invisible" regime of work.

TECHNICAL SPECIFICATIONS

Nominal heat output | **18kW** |

Space heating output | **1kW** |

Water heating output | **17kW** |

Efficiency at nominal heat output | **η% 92** |

Weight | **180Kg** |

Primary air combustion pipe diameter | **38mm** |

Exhaust gas pipe diameter | **80mm** |

Maximal heating area | **130m²** |

Hourly fuel consumption | **min. 1,2Kg/h max. 3,2Kg/h** |

Tank Capacity | **22Kg** |

Boiler capacity | **32l** |

Maximal operating pressure | **2 bar** |

Electrical power consumption | **450W** |

Electrical power supply | **230V / 50Hz** |
